

At Newtown Linford Primary School we designed our curriculum around who we want our children to be...

Curious

Through Science, History and RE enquiry based units children will be prepared to ask questions about the world they live in. They will be critical thinkers.

Global

Children will be ready to fully embrace the global world we live in. Through Geography and RE they will understand the geography and cultures present in our world. Furthermore, they will be able to compete and communicate globally through a highly effective Computing curriculum.

Secondary Ready

Children will be secondary ready. They will have mastered the Key Stage 2 reading, writing and mathematical skills and knowledge they need to excel in Year 7.

Expressive

Children will learn about the work of great artists, musicians, architects, designers and creators. They will be taught the skills they need to create their own works inspired by themselves or others. Children will be given opportunities to perform or show their work.

Ethical

Well chosen texts and a thorough PSHE curriculum support children to make good choices and treat all people equitably.

Healthy

In PE children will learn skills and develop these through enjoyable games. They will be physically active and know how to look after their bodies. In PSHE and Science they will learn about their bodies and healthy lifestyle choices, both physically and mentally.
